

# Vinyl Banner Guide

## Specifications for vinyl banner artwork

Your artwork needs to be set up to include:

- Full CMYK Colour (if your artwork is in RGB there will be colour changes)
- 75-150 dpi high quality images
- Preferably a PDF or JPEG file document
- File size smaller than 200MB
- 25mm bleed, so all important elements such as any text, needs to be 36mm from the edge of the page. This accounts for hemming & eyelets.
- Fonts outlined or embedded

You can either upload your artwork on our website, or alternatively email across your files to [artwork@instantprint.co.uk](mailto:artwork@instantprint.co.uk) where our studio team will create a manual proof for your approval.

## Checking Your Proof

A manual proof is created by our team if you have emailed across your artwork.

This resembles the final printed version.

Please view your proof on a desktop computer or a laptop using Adobe Acrobat or Adobe Reader. Smart phones or tablets of any variety can be extremely unreliable for viewing proofs.

Uploading your artwork on the website.

The proof will show a red safety line, all important information such as text needs to be inside this section, the blue line represents the trim line - any information in this area may be trimmed during printing.
