

# Flag Instructions

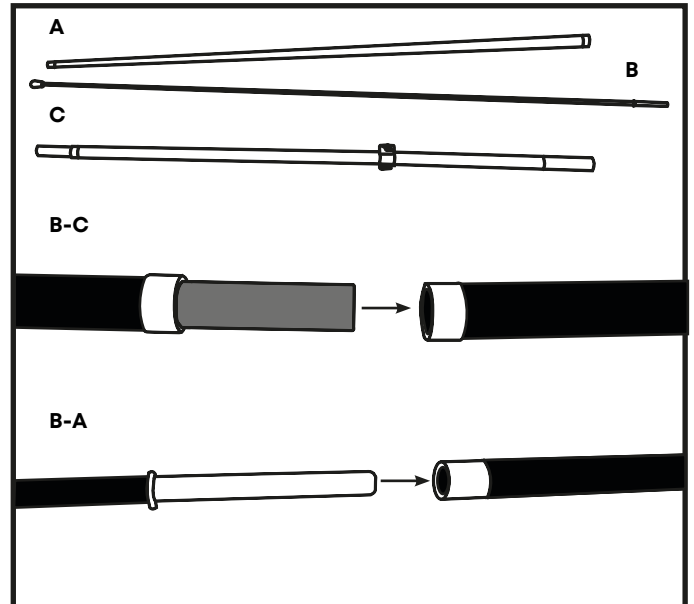

Estimated time: 5 Minutes

## Assembly

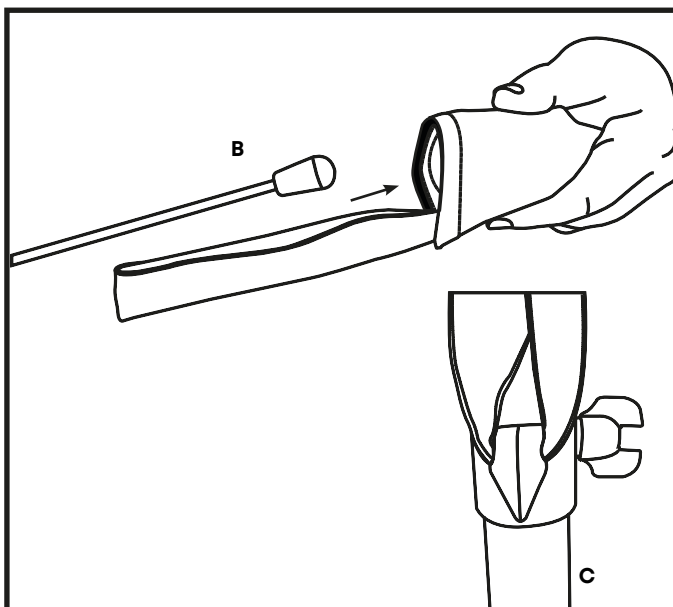

These instructions have been written so you can easily set flags up in no time at all. Although images of the flag types and bases may differ, these instructions are representative of all.

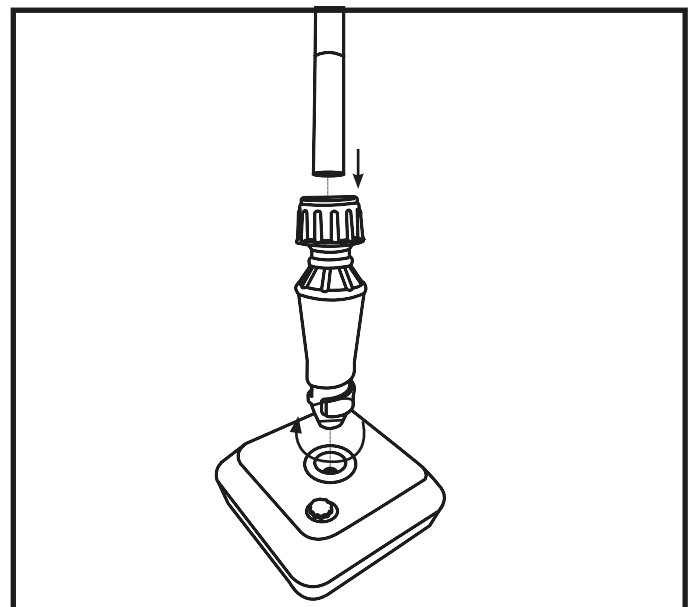

1. Take your base and fill it with sand or water.

2. Next, arrange the poles in size order before sliding them together to create one large flag pole.

3. Keeping it low to the ground, insert the thinnest end of the pole into the sleeve of the flag, gently pulling it over the whole length of the pole.

4. Insert the flag to the pole receiver. Place your flag into the base and twist clockwise to lock.
