

instantprint.

A5 148mm x 210mm Finished Size 154mm x 216mm With Bleed

Bleed Area

You will need to extend your design to fill the bleed area. This area will be trimmed to make sure you don't have any unwanted white lines.

Safe Zone

The safe zone is the 3mm inside of the cut line. Make sure all important parts and text of your design are kept away from this area. Any graphics in this area risk being clipped when cutting.

Cut Line

This is where we aim to cut your design to the finished size. Any part of your design placed on the other side of this line will be cut off.

Top Tips From Amy!

Make it eye catching with a clear focal point!

Use a central image, graphic or headline to help draw the viewer to the most important information you have to communicate.

If you need anymore more help, I can resize your artwork, convert your files, and generally help with youre design.
